## DETAILED ACTION

Claims 1-48 are pending in this application.

### *Action Summary*

1.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### *Double Patenting*

2.

Claims 18-21, 31, 32 and 45 stand provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3, 5, 10 11, 31, 32 and 45 of copending Application No. 10/622,480. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications are claiming gonichromatic/light reflecting cosmetic make-up compositions.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

This rejection of record stands for the reasons stated in the previous office action. Additionally, applicant has failed to provide the necessary timely filed terminal disclaimer which would obviate said rejection of record.

3.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-21, 31, 32 and 45 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Ramin et al USP No. 6,491,932 in view of Grimm et al US 2002/0064509 A1 for the reasons stated in the previous office action.

The examiner has considered applicant's arguments but has not found them to be persuasive. Grimm teaches a multilayer structure having at least one goniochromatic pigment claimed by and also argued by applicant. Applicant is arguing that said particles do not fall within the list of reflective particles suitable for use in the present invention listed in the instant specification is not found to be persuasive since said limitations are not found in the instant claims. Grimm teaches a lipstick as a

cosmetic composition and the interferential multilayer structure as a goniochromatic pigment to achieve a goniochromatic effect.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
